

## Invest in Sustainability

Daisy Energy's goal is to assist people and businesses in becoming more environmentally friendly while lowering their energy bills. Not only do we help you save by reducing your energy consumption, but we also have an incentives team who will make sure you can take full advantage of any available grants or rebates.

Founded in 2008, our mission is to educate businesses, organizations and individuals about the benefits, both financial and environmental, of sustainable energy practices. By doing so, we can all prosper while reducing our impact on the earth.

When it comes to upgrading your commercial or industrial space with smart, energy efficient technologies, you have choices.

We'll work hard to earn your trust as the leading provider of sustainable energy solutions in Southern Ontario.

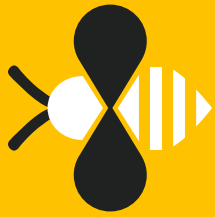

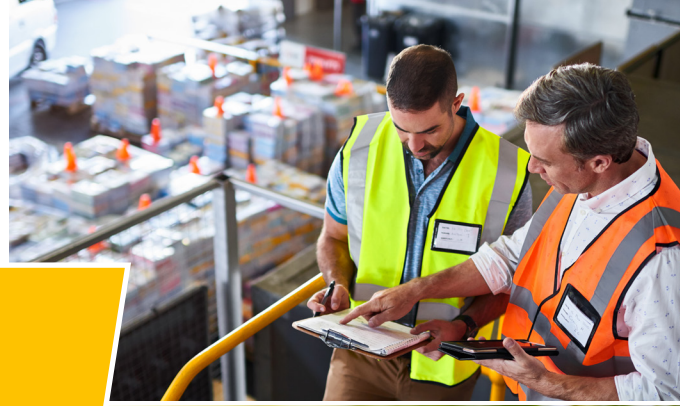

Our services include:

- Full Needs Analysis
- Comprehensive Energy Savings Analysis and Proposal
- Rebate Application Assistance
- The Highest Quality Products
- Warranty and Maintenance Program

**BEE SMART**  
ENERGY FACILITY

The Daisy Energy BEE SMART Energy program provides organizations with energy saving solutions to address the following concerns:

- Continually rising energy prices that are difficult to pass on to your clients or to accurately budget for
- Serious financial consequences faced by many organizations if they do not take control of their energy usage

**The BEE SMART Energy program provides solutions to address rising energy costs using the latest technology to drive down energy waste and operate more efficiently.**

We also provide complete design, install and maintenance of solar energy and energy storage systems that allow our clients to:

- Generate their own clean energy Reduce Global Adjustment charges
- Offset the impact of rising energy costs

**The added benefit, and the one we think is most important, is that by reducing energy consumption and producing green renewable energy we can lower our impact on the planet - an important first step to combatting the effects of climate change.**

Our BEE SMART Energy - Recognition Program is more than just saving our clients money. Daisy Energy is committed to planting 1 tree for every 100 kWh of energy saved or produced via renewables on behalf of our clients.

## **BEE SMART ENERGY RECOGNITION PROGRAM:**

**Energy Efficiency Rewards:** Daisy Energy will plant 1 tree in your name for every 100 kWh of energy saved in year one.

**Green Energy Rewards:** Daisy Energy will plant 1 tree in your name for every 100 kWh of clean energy produced in year one.

**Together we CAN make a difference!**
